- YAŞAR rice milling machines has advantages including having dust free environment rice milling line, Cooling Rice System, Storing rice in 304 SS bunkers.
- We provide PLC controlled system with SCADA system.
- Our products is very user friendly
- and can be handle with least number of operators.

GRAIN DRYERS

- **YAŞAR MAKİNE** in the field of machine manufacturing With more than 52 years of production experience, we produce 3 different size of dryer in 18 - 33 - 55 m³ (For Paddy; 10 – 20 – 32 Ton Per Batch) capacities with 4 different type of Burner; Husk (Paddy Husk), Gas, Diesel or Coal.
- Our husk burner dryer is environment friendly system which is good option for our customer to reduce the energy consume.
- Paddy, Paddy Seed, Corn (sunflower oil, soybean, rape), cereals, legumes etc. as well as working with all kinds of products.
- **YAŞAR MAKİNE** dryers are designed to serve various climatic conditions and different product types of the world.
- Drying Machines are operated by electric motor.
- The silo outer surfaces of the dryer are completely made of stainless steel perforated sheet and their durability is increased by a frame of steel construction. Stainless steel external surfaces and cold-shot special alloyed center worm wear resistance is designed not to damage the product.

SILO GRAIN STORAGE

Our silos for grain storage are produced by advanced technology and designed to respond all types of material storage. All our storage silos and conveying equipment are designed to meet all your material storage and material handling needs.

Our silo is a one of the most wanted products in the world for high quality steel grain storage silos and silo equipment . Our product is trusted both in Turkey and international market because of having the latest technology and the endurance of its products.t

For hopper bottom silos the production can vary from 5 to 1.600 tons and for flat bottom silos from 50 to 15.000 tons can be realized.

Our Group Silo Production line was founded in Turkey, Aksaray city in 1981 .
The quality management system is certified with TS EN ISO 9001-2008- DIN EN ISO 9001-2008.

PADDY LABORATORY AND TESTING UNITS

- PADDY AND RICE TESTING MACHINES
- RICE BROKEN TEST MACHINE
- GRAIN MOISTURE METER

PADDY AND RICE TESTING MACHINES:

- With 100 gram of paddy you can test how many gram of rice result you are taking and inside of the rice how many gram of broken rice you have.
- For example; 100 gram of paddy Results ; 55 gram head rice and 10 gram broken rice. Total: 65 gram rice.
- When you processed paddy you can see the quality and whiteness of rice.

HAZELNUT PROCESSING MACHINES

YASAR MAKINE HAZELNUT PROCESSING MACHINES

are made with strong body structure , continuous production features and advanced technology applications. Turkey is the main producer and exporter of hazelnut in the world it has a market share between %70 - 80% of the worldwide hazelnut production.

Yasar Makine is main machines supplier in this field in our country.

About this product we export to main countries in hazelnut business including AZERBAIJAN, GEORGIA and ITALY.
